Diagnosis Report

POSSIBLE DISEASE
Early Blight (*Alternaria solani*) or Septoria Leaf Spot

CAUSE

Fungal pathogen spread by wind, splashing water, contaminated tools, or plant debris. Warm, humid conditions with insufficient air circulation promote rapid development....

TREATMENT & SOLUTIONS

1. Prune and dispose of infected leaves. 2. Apply copper-based fungicide or *Bacillus subtilis* organic product. 3. Switch to drip irrigation to avoid wetting foliage. 4. For conventional control, use c...

PREVENTION / PRECAUTIONS

1. Crop Rotation — avoid planting tomatoes in the same spot for 2-3 years. 2. Remove all plant debris after season. 3. Use disease-resistant varieties. 4. Ensure proper plant spaci...

Screenshot 4 — Browser Network Tab (POST /api/ai/crop-advice → 200 OK)

Proof of successful frontend → backend communication via HTTP POST. Status 200 confirms the Gemini API was called and advice was returned.
